ETC5543 Business analytics creative activity

11 September 2025

Coverage and reproducibility (30%)

- Includes all relevant project materials (code, report, presentation).
- Includes data files, if appropriate.
- Analyses and outputs are reproducible (except in cases where data could not be included).

Good practices (40%)

- Regular and frequent commits.
- Meaningful commit messages.
- Follows relevant conventions (e.g., design/structure of R packages).
- Includes a software licence.
- No temporary files.
- No large or sensitive/confidential data.

Ease of use (30%)

- Includes an informative README file.
- Well organised file structure: good use of folders and easy to navigate.
- File names are informative and use a consistent style.
- Documentation and examples are included, as appropriate (esp. for R packages).
- Code is appropriately formatted and commented.
